## NeoColab\_REC\_CS23231\_DATA STRUCTURES

### REC\_DS using C\_Week 1\_COD\_Question 4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

As part of a programming assignment in a data structures course, students are required to create a program to construct a singly linked list by inserting elements at the beginning.

You are an evaluator of the course and guide the students to complete the task.

##### ***Input Format***

The first line of input consists of an integer N, which is the number of elements.

The second line consists of N space-separated integers.

##### ***Output Format***

The output prints the singly linked list elements, after inserting them at the beginning.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 5

78 89 34 51 67

Output: 67 51 34 89 78

### **Answer**

```
#include <stdio.h>
```

```
#include <stdlib.h>
```

```
struct Node {  
    int data;  
    struct Node* next;  
};
```

```
// You are using GCC
```

```
void insertAtFront(struct Node**head_ref,int new_data)
```

```
{  
    struct Node*new_node = (struct Node*)malloc(sizeof(struct Node));  
    new_node->data = new_data;  
    new_node->next = (*head_ref);  
    (*head_ref) = new_node;  
}
```

```
void printList(struct Node*temp){  
    while(temp!= NULL)  
    {  
        printf("%d ",temp->data);  
        temp = temp->next;  
    }  
    printf("\n");  
}
```

```
int main(){  
    struct Node* head = NULL;
```

```
int n;  
scanf("%d", &n);  
  
for (int i = 0; i < n; i++) {  
    int activity;  
    scanf("%d", &activity);  
    insertAtFront(&head, activity);  
}  
  
printList(head);  
struct Node* current = head;  
while (current != NULL) {  
    struct Node* temp = current;  
    current = current->next;  
    free(temp);  
}  
  
return 0;  
}
```

**Status :** Correct

**Marks : 10/10**
